**VILLA COPPER OXYCHLORIDE WP**

**MATERIAL SAFETY DATA SHEET**

### 1. IDENTIFICATION OF THE SUBSTANCE

- **Product name:** COPPER OXYCHLORIDE WP
- **UN Number:** 2775
- **Supplier:** Villa Crop Protection (Pty) Ltd.
- **Telephone:** (011) 3962233
- **Fax:** (011) 3964666
- **Website:** [www.villacrop.co.za](http://www.villacrop.co.za)

**Emergency telephone:** (011) 396 2233, 083 326 9272

**24 Hr Emergency Numbers:**
- Bateleur Trauma: 083 1233 911 or 0860 333 911
- Red Cross Poison Information Centre: 021 658 5428
- Tygerberg Poison Information Centre: 021 931 6129
- Griffon Poison Information Centre: 082 446 8946

### 2. COMPOSITION / INFORMATION ON INGREDIENTS

- **Common name:** Copper oxychloride
- **Chemical Name:** Dicopper chloride trihydroxide (IUPAC)
- **CAS No.:** 1332-40-7
- **Chemical Family:** Inorganic
- **Chemical Formula:** ClCu₂H₃O₃ (Mol. Wt.: 213.6)
- **Use:** Foliar fungicide with protective action.
- **Formulation:** Copper oxychloride: 850 g/kg (metallic copper equivalent: 500 g/kg)
- **Wettable Powder**

**SYMBOLS:**
- **RISK-PHRASE(S):** R 22

### 3. HAZARD IDENTIFICATION

- **Toxicity class:** WHO III; EPA III
- **Likely routes of exposure:** Skin and eye contact and ingestion.
- **Eye contact:** Irritant to eyes.
- **Skin contact:** Slightly irritant.
- **Ingestion:** The product can be harmful.
- **Inhalation:** Negligible toxicity

### 4. FIRST AID MEASURES AND PRECAUTIONS

Reactions are not likely to occur unless the absorbed dose is extraordinary.

**Inhalation:** Unlikely to occur. Remove source of contamination or move victim to fresh air. Monitor for respiratory distress. Administer 100% humidified supplemental oxygen with assisted ventilation as required.

**Skin contact:** Remove contaminated clothing, shoes and leather goods. Gently wipe off excess chemical. Wash skin gently and thoroughly with water and non-abrasive soap. Seek medical advice if necessary. Persons who become sensitized may require specialized medical management with anti-inflammatory agents.

**Eye contact:**
- Immediately flush the eyes with gently flowing lukewarm water or sodium bicarbonate solution for 20 to 30 minutes, occasionally lifting the upper and lower lids. Obtain medical attention if necessary.

**Ingestion:**
- The ingestion of a large quantity of Copper oxychloride is followed by nausea and vomiting. Metallic taste and a burning sensation in the oesophagus and stomach. The stomach should be emptied by aspiration and lavage and demulcents such as milk or egg white should be given freely.

**Advice to physician:**
- Treat symptomatically and supportively. Chelating agents such as penicillamine or sodium calciumedetate should be given. Pethidine may be given to relieve pain if necessary.

### 5. FIRE FIGHTING MEASURES

- **Fire hazard and explosion hazard:**
  - No fire hazard, but fine dust in air may form an explosive mixture if source of ignition is present.

**Extinguishing agents:**
- Extinguish fires with water, carbon dioxide, dry powder, or alcohol-resistant foam.

**Fire fighting:**
- Fight fire from maximum distance. Remove container from fire area if possible. Contain fire control agents for later disposal. Water can be used to cool unaffected containers.

**Personal protective equipment:**
- Fire-fighters and others that may be exposed should wear full chemical protective clothing and full-face breathing apparatus.

### 6. ACCIDENTAL RELEASE MEASURES (SPILLAGE)

**Personal precautions:** For personal protection see Section 8.

**Environmental precautions:** Do not allow entering drains or watercourses. When the product contaminates public waters, inform appropriate authorities immediately in accordance with local regulations.
VILLA COPPER OXYCHLORIDE WP

Occupational spill: For small dry spills, sweep up with damp earth or sand or other suitable absorbents, taking care not to raise a dust cloud. Place the material into a clean, dry container and cover for subsequent disposal. In situations where product comes in contact with water, contain contaminated water for later disposal. Do not flush spilled material into drains. Keep spectators away and upwind. Large spills: Should be covered to prevent dispersal. Vacuum or shovel wasted into an approved drum. To decontaminate spill area, tools and equipment, wash with a suitable solution (i.e. organic solvent, detergent bleach or caustic). Add the solution to the drums already collected. Label drums with its content and dispose it in accordance with local regulations.

7. HANDLING AND STORAGE REQUIREMENTS

Handling:
Use with adequate ventilation. Wash hands before eating, drinking, chewing gum, smoking, or using the toilet. Remove clothing immediately if the product gets inside. Then wash skin thoroughly using a non-abrasive soap and put on clean clothing.
Do not apply directly to areas where surface water is present, or to intertidal areas below the mean high water mark. Water used to clean equipment must be disposed of correctly to avoid contamination.
Storage:
Keep out of reach of unauthorized persons, children and animals. Store in its original labelled container in shaded, well-ventilated area. Store in dry area. Not to be stored next to foodstuffs and water supplies. Local regulations should be complied with.

8. EXPOSURE CONTROL/PERSOANL PROTECTION

Comply with occupational safety, environmental, fire, and other applicable regulations.
PERSONAL PROTECTIVE EQUIPMENT:
Clothing: Employee must wear appropriate protective (impervious) clothing; boots, hat and equipment to prevent repeated or prolonged skin contact with this substance. Do not wear leather clothing.
Gloves: Employee must wear appropriate chemical resistant protective gloves to prevent contact with this substance.
Eye protection: The use of safety goggles is recommended.
Emergency eyewash: Where there is any possibility that an employee’s eyes may be exposed to this substance, the employer should provide an eye wash fountain or appropriate alternative within the immediate work area for emergency use.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Light green powder
Odour: Odourless
Flash point: Not applicable
Explosive properties: Fine dust in air may form an explosive mixture if source of ignition is present.
Oxidizing properties: No information currently available.
pH: No information currently available.
Bulk density: 0.7 to 0.8 kg/litre
Persistent foaming: 8 ml/minute in standard hard water.
Storage stability: Stable up to two years under normal conditions.
Susceptibility: 88 % suspended after standing for 30 minutes in standard hard water.
Solubility in water: Dispersible in water.
Solubility in organic solvents: Soluble in dilute acids and ammonium hydroxide.
Partition-coefficient in n-octanol / water: No data information available.
Melting point: Not applicable.

10. STABILITY AND REACTIVITY

Stability: Stable under normal, dry storage conditions. (Very stable in neutral media).
Incompatibility: Incompatible with mercury-containing compounds, thiram, DNOC, lime sulphur and dithiocarbamates.
Thermal decomposition: Decomposes on heating above 220 °C. Decomposes on heating in alkaline media with the formation of copper oxides (toxic).

11. TOXICOLOGICAL INFORMATION

Acute oral LD₅₀: > 1694 mg/kg in rats.
Acute dermal LD₅₀: > 2400 mg/kg in rats.
Acute inhalation LC₅₀: LC₅₀ > 30mg/l (4 hour).
Acute skin and eye irritation: Skin and eye irritating.
Dermal sensitization: No information currently available.
Carcinogenicity: Animal studies did not detect any carcinogenic activity. No human data available.
Teratogenicity: Animal studies did not detect any teratogenic effects. No human data available.
Mutagenicity: Not mutagenic.

12. ECOLOGICAL INFORMATION

Degradability: Formation of toxic oxides on heating. Decomposes at temperatures > 220 °C.
Mobility: Strongly absorbed by soils
Accumulation: No information currently available.
ECOTOXICOLOGY:
Birds: No information available
Fish: LC₅₀ (48 hours) = 2.2 mg/l (Carp)
Daphnia: LC₅₀ (24 hours) = 3.5 mg/l
Bees: Not toxic to bees
Earthworms: No information available
Soil micro-organisms: No information available

13. DISPOSAL CONSIDERATION

Pesticide disposal:
Contaminated absorbents, surplus product, etc., should be burned in a high-temperature incinerator (> 1000 °C) with effluent gas scrubbing. Never pour untreated waste or surplus products into public sewers or where there is any danger of run-off or seepage into water systems. Comply with local legislation applying to waste disposal.

Package product wastes:
Emptied containers retain vapour and product residues. Observe all labelled safeguards until container is cleaned, reconditioned, or destroyed. Combustible containers should be disposed of in pesticide incinerators or buried in an approved landfill. Non-combustible containers must first be triple-rinsed with water. Containers should be punctured and transported to a facility for recycling or disposal in approved landfill site. Comply with any local legislation applying to disposal.

14. TRANSPORT INFORMATION

UN NUMBER: 2775
ADR/IRD:
Substance ID NR: 2775
Hazard ID NR: 60
Label: 6.1 + 3
AIR/IATA:
Class: 6.1
Subsidiary Risk: -
Hazard Label: Poison
Packaging group: III
Passenger aircraft: 619 (max 100 kg)
Cargo aircraft: 619 (max 200 kg)
IMG/IMO:
Packaging group: III
Label of class: 2775
Subsidiary Risk: -
Shipping Name: Poison

15. REGULATORY INFORMATION

Symbol: Xₙ;
Indication of danger: Harmful if swallowed.
Risk phrases: R 22
Safety phrases: S 2

16. PACKING AND LABELING

Packed in a) 50 and 25 kg HDPE bags with virgin polythene liner and b) in 2 kg plastic containers and labelled according to the South African regulations and guidelines.

17. OTHER INFORMATION

All information and instructions provided in this Material Safety Data Sheet (MSDS) are based on the current state of scientific and technical knowledge at the date indicated on the present MSDS and are presented in good faith and believed to be correct. This information applies to the PRODUCT AS SUCH. In case of new formulations or mixes, it is necessary to ascertain that a new danger will not appear.

It is the responsibility of persons in receipt of this MSDS to ensure that the information contained herein is properly read and understood by all people who may use, handle, dispose or in any way come in contact with the product. If the recipient subsequently produces formulations(s) containing this product, it is the recipients sole responsibility to ensure the transfer of all relevant information from this MSDS to their own MSDS.
