3. HAZARD IDENTIFICATION

Toxicity class: WHO II. Moderately hazardous. May cause irritation to the skin and eyes. May cause skin sensitisation with allergic rashes.

4. FIRST AID MEASURES AND PRECAUTIONS

Remove the victim from the area of exposure. Wash off remaining material with plenty of water. In the event of any complaints or symptoms, avoid further exposure. Immediately consult a doctor. In the case where Indoxacarb is ingested methemoglobinemia may occur. In contact with eye may cause irritation with tearing, pain or blurred vision. In contact with skin may cause irritation with itching, burning, redness, swelling or rash. May cause skin sensitisation with allergic rashes.

Inhalation: Immediately remove source of contamination or move victim to fresh air. If breathing has stopped, perform artificial respiration and administer oxygen. Avoid mouth-to-mouth resuscitation. Keep person warm and at rest. Treat symptomatically and supportively as and when required. Seek medical advice immediately.

Skin contact: Remove contaminated clothing, shoes and leather goods immediately. Gently wipe of excess chemical. Wash skin gently and thoroughly with non-abrasive soap or mild detergent and large amounts of water until no evidence of chemical remains (approximately 15 to 20 minutes). Seek medical advice if necessary.

Eye contact: Flush eyes immediately with large amounts of gently flowing cold water or normal saline solution, occasionally lifting upper and lower lids, until no evidence of chemical remains (approximately 15 to 20 minutes). If irritation persists, get medical attention.

Ingestion: Have victim rinse mouth thoroughly with water. Do not induce vomiting, due to the aromatic solvent. Seek medical advice immediately. If the person is alert and respiration is not depressed, give large quantity of water to drink. Never give anything by mouth to an unconscious person. Establish and maintain airway. Treat respiratory difficulty with artificial respiration and oxygen. Qualified medical personnel should perform administration of gastric lavage or oxygen.

Advice to physician: No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

5. FIRE FIGHTING MEASURES

Fire/Explosion hazard: Non-Flammable.

Extinguishing agents: Extinguish fires with carbon dioxide, dry powder, or alcohol-resistant foam. Water spray can be used for cooling of unaffected stock, but avoid water coming in contact with the product. Use as little water as possible. Use spray or fog. Solid stream may cause spreading. Contain water used for fire fighting.
UNIVERSAL ADVANCE 150 SC

MATERIAL SAFETY DATA SHEET

Handling: Harmful if swallowed. Avoid inhalation and contact with eyes and skin. Use with adequate ventilation. Do not handle broken packages without protective equipment. Wash hands before eating, drinking, chewing gum, smoking, or using the toilet. Remove clothing immediately if the product gets inside. Then wash skin thoroughly using a non-abrasive soap and put on clean clothing. Seek medical advice. Do not apply directly to areas where surface water is present, or to intertidal areas below the mean high water mark. Water used to clean equipment must be disposed of correctly to avoid contamination. Worker should shower at the end of each work day. Launder all clothing before it is re-used again.

Storage: Store in its original container in dry, cool, well-ventilated area. Avoid excess heat. Not to be stored next to foodstuffs and water supplies. Keep out of reach of children, uninformed persons and animals. Do not contaminate other pesticides and fertilizers.

7. HANDLING AND STORAGE REQUIREMENTS

8. EXPOSURE CONTROL/PERSONAL PROTECTION

It is essential to provide adequate ventilation. The measures appropriate for a particular worksite depend on how this material is used and on the extent of exposure. Ensure that control systems are properly designed and maintained. Comply with occupational safety, environmental, fire, and other applicable regulations.

PERSONAL PROTECTIVE EQUIPMENT:

Respirator: An approved full-face respirator suitable for protection from spray or mists of pesticides is required. Limitations of respirator use specified by the approved agency and the manufacturer must be observed.

Clothing: Employee must wear appropriate protective (impervious) clothing; boots, hat and equipment to prevent repeated or prolonged skin contact with this substance. Do not wear leather clothing.

Gloves: Employee must wear appropriate chemical resistant protective gloves to prevent contact with this substance.

Eye protection: The use of chemical resistant goggles or face shield.

Emergency eyewash: Where there is any possibility that an employee’s eyes may be exposed to this substance, the employer should provide an eye wash fountain or appropriate alternative within the immediate work area for emergency use.

UNIVERSAL ADVANCE 150 SC
for later disposal. Avoid the accumulation of polluted run-off from the site.

Firefighting: Remove spectators from surrounding area. Isolate the fire area and evacuate downwind. Use a recommended extinguishing agent for the type of surrounding fire.

Fight fire from maximum distance and use unmanned hose holder or monitor nozzles. Contain fire control agents for later disposal. Avoid inhaling hazardous vapours and fumes from burning materials. Keep upwind.

Remove container from fire area if possible and without risk. Water can be used to cool unaffected containers but must be contained for later disposal.

Dyke fire control water for later disposal. Do not scatter the material. Avoid pollution of waterways.

Do not use high volume water jet, due to contamination risk. Contain water used for fire fighting for later disposal.

Avoid the accumulation of polluted run-off from the site.

Personal protective equipment: Fire may produce irritating or poisonous vapours or gases (oxides of chlorine and sulphur) or other products of combustion. Fire fighters and others that may be exposed should wear full protective clothing and self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES (Spillage)

Personal precautions: Avoid contact with skin and eyes. Do not breathe in fumes. For personal protection see Section 8.

Environmental precautions: Do not apply on directly to water, to areas where surface water is present or to intertidal areas below the mean mark. Do not contaminate water by disposal of equipment washwaters. See “Storage, shipment and Disposal” section.

Occupational spill: Do not touch-spilled material; stop leak if you can do it without risk. Keep out unprotected persons and animals.

For spills: Soak up with absorptive material such as damp earth or sand or other suitable non-combustible absorbent material. Place the material into a clean, dry container and cover for subsequent disposal. In situations where product comes in contact with water, contain contaminated water for later disposal. Prevent material from spreading by damming in with absorptive material. Do not flush spilled material into drains. Keep spectators away and upwind. To decontaminate spill area, tools and equipment, wash with a suitable solution (i.e. organic solvent, detergent bleach or caustic). Add the solution to the drums already collected. Label drums with its content and dispose it in accordance with local regulations. Open burning or dumping of this material is prohibited. Do not get water inside containers.
9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** Viscous liquid/ Suspension concentrate.

**Odour:** Oily odour.

**Colour:** Off white.

**Relative density:** 1.39 g/ml.

**Solubility in water:** Approximately 0.2 ppm (a.i.).

**Flash point:** >61°C.

**Flammability:** Not flammable.

**Corrosive property:** Non-corrosive.

**Explosability:** Not explosive, thermally stable.

**Compatibility:** Compatible with most insecticides and fungicides.

**pH:** 6.0 to 8.0.

**pH of 1% aqueous dilution:** 5.0 to 8.0.

10. STABILITY AND REACTIVITY

**Storage stability:** Stable for a period of 2 years under normal warehouse conditions. Considered stable under normal use and storage conditions.

**Condition to avoid:** Flame, fire and high temperature.

**Incompatibility (Material to avoid):** Incompatible with alkaline pesticides.

**Hazardous decomposition:** Nitride, chloride, carbon dioxide and so on.

**Hazardous Polymerisation:** Not known to occur.

11. TOXICOLOGICAL INFORMATION

**Formulation:**
- **Acute oral LD<sub>50</sub>**:
  - 751 (in female) mg/kg
  - 3619 (in male) mg/kg

- **Acute dermal LD<sub>50</sub>:** >5000 mg/kg

- **Acute inhalation LC<sub>50</sub>:** >2.70 mg/l/4 hours

- **Very low toxicity by inhalation**

- **Acute skin irritation:** Slightly skin irritant.

- **Acute eye irritation:** May cause slightly eye irritation. It is not an eye irritant in laboratory animals.

- **Sensitization:** Mild skin sensitizer

**Chronic toxicity:** NOEL DPX-JW062: (90 d) overall systemic NOAEL for rats 10 ppm (0.6 mg/kg b.w. daily) (EU Rev. Rep.); (2 y) for male rats 60, female rats 40 ppm; (18 mo) for male and female mice 20 ppm; (1 y) for male and female dogs 40 ppm.

- **ADI:** (JMPR) 0.01 mg/kg b.w. [2005, 2006] (tech.)
- **WHO (a.i.):** II (Moderately hazardous)

12. ECOLOGICAL INFORMATION

In animals: Metabolism in rats after oral dosing was studied using both DPX-JW062 and DPX-MP062. Most of the dose was excreted within 96 hours. Extensive metabolism to numerous minor metabolites occurs. In urine, metabolites were cleaved products (indane or trifluoromethoxyphenyl ring products), whilst, in faeces, major metabolites retained both these moieties. Major metabolic reactions included hydroxylation of the indane ring, hydrolysis of the carboxymethyl group from the amino nitrogen, and opening of the oxadiazine ring, which gave rise to cleaved products.

In the soil: DT<sub>50</sub> 17 d in tama silt loam soil. Indoxacarb is considered to be moderately persistent; aerobic DT<sub>50</sub> 3–23 d, anaerobic DT<sub>50</sub> 186 d. It is considered to be immobile; K<sub>oc</sub> 3300–9600 ml/g. K<sub>d</sub> 26–95 l/kg

13. DISPOSAL CONSIDERATION

**Pesticide disposal:** Open dumping or burning of this pesticide is prohibited. Waste resulting from the use of this product cannot be reused or reprocessed. Never pour untreated waste or surplus products into public sewers or where there is any danger of run-off or seepage into water systems. Do not contaminate rivers, dams or any other water sources with the product or used containers. Comply with local legislation applying to waste disposal.

**Container disposal:** Emptied containers retain vapour and product residues. Observe all labelled safeguards until container is destroyed.

**TRIPLE RINSE** empty containers in the following manner: Invert the empty container over the spray or mixing tank and allow draining for at least 30 seconds after the flow has slowed down to a drip. Thereafter rinse the container three times with a volume of water equal to a minimum of 10% of that of the container. Add the rinsing to the contents of the spray tank before destroying the container in the prescribed manner.
UNIVERSAL ADVANCE 150 SC

MATERIAL SAFETY DATA SHEET

Do not re-use the empty container for any other purpose but destroy it by perforation and flattening and bury in an approved dumpsite. Prevent contamination of food, feedstuffs, drinking water and eating utensils. Comply with local legislation applying to waste disposal.
