

# MAX-IN® Calcium

## Contains Ca for optimum crop Production

**NutriSolutions 360™ MAX-IN® Calcium** secondary nutrients are an effective foliar-applied source of calcium, which is vital for increased plant health and growth. **MAX-IN® Calcium** secondary nutrients can be used in a broad spectrum of crops and contain a patented, crop-based adjuvant system for maximum nutrient efficacy.

## Promotes nutrient delivery

**MAX-IN®** products include patented CornSorb™ technology, which greatly increases movement of nutrients through the leaf cuticle to internal leaf structures. This makes more of the applied nutrient available to the plant.

## Plant health benefits

Calcium is a component of every cell wall and is involved in cell elongation and cell division. It influences the structural stability and permeability of cell membranes and acts as an activator for only a few enzymes. Calcium is credited for its beneficial effect on plant vigor, and grain and seed formation.

## Guaranteed analysis

Calcium (Ca) 10%

**MAX-IN® Calcium** weighs 1.3 kilogram per liter at 20°C (SG)

## WinField™ plant nutrition

WinField™ plant nutrition provides high-quality plant nutrients for healthy plants and optimal yields.

These proven, versatile performers are specially formulated to meet the nutritional needs of crops across a broad range of soil conditions, fertility programs and tillage practices.

## Factors affecting nutrient availability in soils

- Soil pH
- Soil organic matter content
- Soil texture
- Soil water content
- Nutrient interactions
- Temperature

See label for specific factors affecting application of **MAX-IN® Calcium** secondary nutrients.

## Precise treatments

Tissue sampling and analysis with the **NutriSolutions® Tool** just before key growth stages will pinpoint nutrient deficiencies and recommend specific **MAX-IN®** nutrient formulations, so you can apply exactly what your crop needs, and nothing it doesn't.

## Application rate and timing

Apply 4.7 to 9.4 liters per hectare for most crops. Please read and follow label directions for rates and timing of applications for specific crops. Multiple applications may be needed for some crops.

## Packaging

- 2 x 10 Litre jugs
- Bulk
- Store above 5°C

**Yielding a better tomorrow.**
