

BUPROFEZIN 500 WDG

INSECTICIDE

Active ingredient: Buprofezin 500 g/kg

A contact and stomach insecticide acting as an insect growth regulator, formulated as a water-dispersible granule for the control of mealy bugs at the larval/nymph stages on citrus

Features

- Inhibits molting of nymphs and larvae
- Treated adults lay sterile eggs
- Two modes of action: contact and stomach, when ingested
- Very effective against mealybug crawlers in citrus
- Short withholding period allows for potential late season application
- Compatible with various IPM programs

Label recommendations

30 g BUPROFEZIN 500 WDG *plus*
250 - 500 ml light narrow range oil per 100 l water

Do's and don'ts

- Scouting is paramount
- Apply when first nymphs hatch
- Repeat 4 weeks later under heavy infestations
- Apply as a full cover spray

ALWAYS READ THE LABEL BEFORE USE
