

# ARENA 206 EC

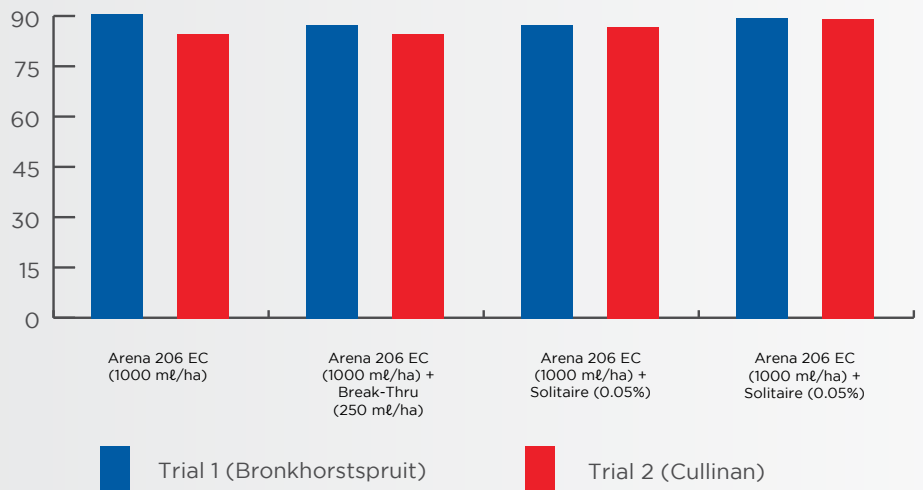

Active ingredient: Benfuracarb (carbamate) 200 g/l  
& lambda-cyhalothrin (pyrethroid) 6 g/l

An emulsifiable concentrate contact and stomach insecticide for the control of maize stalk borer (*Busseola fusca*) and sorghum stem borer (*Chilo partellus*) on maize

INSECTICIDE

Summary of 2 trials showing the performance of ARENA 206 EC in controlling stalk borers (*Busseola fusca*) in maize

## Features

- ARENA 206 EC has an IRAC Group 1A + 3 insecticide
- Combination of systemic & non-systemic insecticide with stomach & contact action
- Contains benfuracarb and lambda-cyhalothrin
- ARENA 206 EC is compatible with other Villa Crop Protection products
- Ideal insecticide for use in programs aimed at combatting resistance
- Requires less packaging, thus more environmentally friendly
- Rarely bio-accumulates or causes major environmental effects
- Product acts immediately, therefore excellent knockdown effect
- Allows for flexibility of application usage

ALWAYS READ THE LABEL BEFORE USE

ARENA 206 EC Active ingredients: Benfuracarb (carbamate) 200 g/l & lambda-cyhalothrin (pyrethroid) 6 g/l,  
Reg. No. L8532 (harmful), Act 36 of 1947  
Registration holder: Villa Crop Protection (Pty) Ltd., Co. Reg. No. 1992/002474/07, PO Box 10413, Aston Manor, 1630. Tel. (011) 396-2233

## Label recommendations

Maize stalk borer and sorghum stem borer:  
1000 ml/ha Arena 206 EC

*NB: Organosilicone adjuvants such as Break-Thru at 100 ml/ha or Solitaire™ at 0.05% is recommended so as to increase the spreading of spray droplets*

## Do's and don'ts

- Can apply preventatively if severe infestation is expected or correctively before or up to 5% of plants showing early damage ("shot hole")
- Never apply ARENA 206 EC to plants nearing maturity as they are no longer growing actively; thus the plants systemic activity is significantly decreased
- Do not apply ARENA 206 EC if crop is under stress (i.e. drought) as this decreases plants systemic activity
- If larvae have penetrated the plant prior to application then poor control may be obtained
- Direct application to plants funnel area for most effective control
- Do not mix with seaweed extracts, amitraz, chinomethionat and prothiophos
