

# NICORON 750 WDG

Active ingredient: Nicosulfuron (sulfonyl urea) 750 g/kg

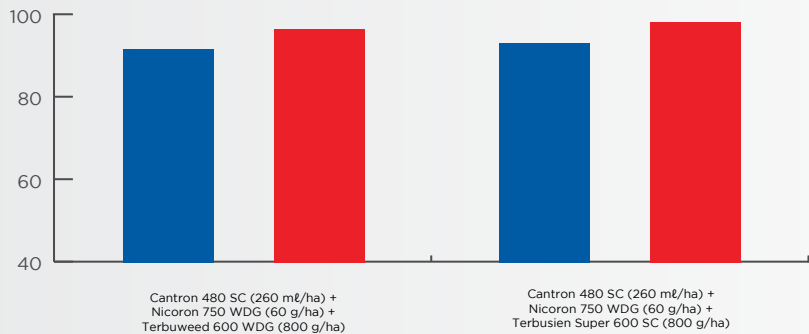

A water dispersible granule, selective post-emergence grass and broadleaf herbicide for the control of grasses, sorghum species and broadleaf weeds in maize

HERBICIDE

Summary of a 2 trials done showing the performance of NICORON 750 WDG when applied post-emergently, at controlling a number of weeds, when applied as various tank mixes. Graph shows the mean percentage overall weed control in the 2 trials at 21 and 42 days after treatment (DAT).

## Features

- NICORON 750 WDG is a HRAC Group B systemic herbicide
- Translocated acropetal and basopetal to growth points
- Compatible with most commonly used broadleaf herbicides
- Stable, high load WDG formulation
- Post-emergence weed control in maize
- Effective against sorghum species such as Johnson's grass (*Sorghum halepensis*)
- WDG formulation with no formulation additives
- Good tank-mixing partner

## Label recommendations

*Dosage rate:*

- 60g/ha
- Refer to label for dosage recommendations with tank mix partners

## Do's and don'ts

- Do not apply this mixture by means of aerial application
- Do not apply on sweetcorn, popcorn or seed maize
- Do not apply NICORON 750 WDG in combination with an organophosphate insecticide, within 14 days of an organophosphate application or following in-furrow applications of organophosphate granular insecticides

ALWAYS READ THE LABEL BEFORE USE
