

HERBICIDE

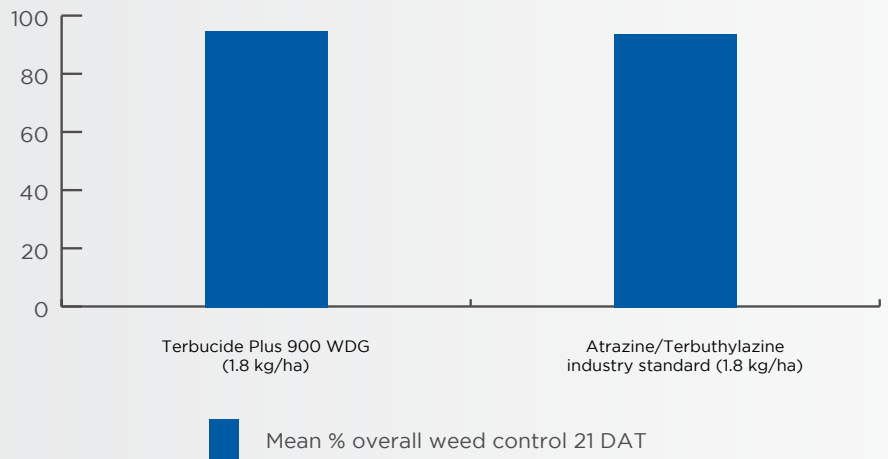

TERBUCIDE PLUS 900 WDG

Active ingredients: Atrazine (triazine) 450 g/kg & terbuthylazine (triazine) 450 g/kg

A dispersible granule herbicide for selective control of most annual broadleaf weeds as well as goose grass in maize

Summary of 3 trials showing the performance of TERBUCIDE PLUS 900 WDG applied pre-emergence in maize, for the control of weeds. The graph shows the mean percentage overall weed control (8 different weed species)

Features

- TERBUCIDE PLUS 900 WDG is a combination of two triazine herbicides, terbuthylazine and atrazine. Triazine is an HRAC group code C1 herbicide
- Systemic herbicide absorbed through the roots and leaves, with translocation in the xylem and accumulation in the apical meristems and leaves
- Atrazine and terbuthylazine have different leaching profiles in the soil
- Compatibility with various other grass and broadleaf herbicides
- Can be applied during pre- or post-emergence weed control in maize

ALWAYS READ THE LABEL BEFORE USE

TERBUCIDE PLUS 900 WDG Active ingredient: Atrazine (triazine) 450 g/kg & terbuthylazine (triazine) 450 g/kg, Reg. No. L9888 (harmful), Act 36 of 1947
Registration holder: Universal Crop Protection (Pty) Ltd. Co. Reg. No. 1983/008184/07.
PO Box 801, Kempton Park, 1620. Tel. (011) 396-2233

Label recommendations

Pre-emergence and early post-emergence
TERBUCIDE PLUS 900 WDG

- Light sand/sand (clay 0 - 10 %) 1.3 kg/ha
- Loamy sand/sandy loam (11- 20 %) 1.8 kg/ha
- Sandy clay loam (clay 21- 30 %) 2.2 kg/ha
- Sandy clay loam/sandy clay (clay 31- 40 %) 2.7 kg/ha
- Sandy clay and soils high in organic matter (clay 41- 50 %) 2.7 kg/ha

NB: On soils with 11- 20 % clay where the carry-over effect of triazines to groundnuts or other sensitive crops needs to be avoided, a tank mixture of 1.1 kg/ha TERBUCIDE PLUS 900 WDG plus 0.7 l/ha Metolachlor 915 EC/ Platinum Plus 915 EC is recommended

Do's and don'ts

- Do not apply post-emergence after the 4-leaf stage of broadleaf weeds and after emergence of grasses
- Add a suitable surfactant such as Villa 51 to the spray mixture, when applied post-emergence
