

COUNTER FC 15G®

Active ingredients: Terbufos (organophosphate) 150g/kg

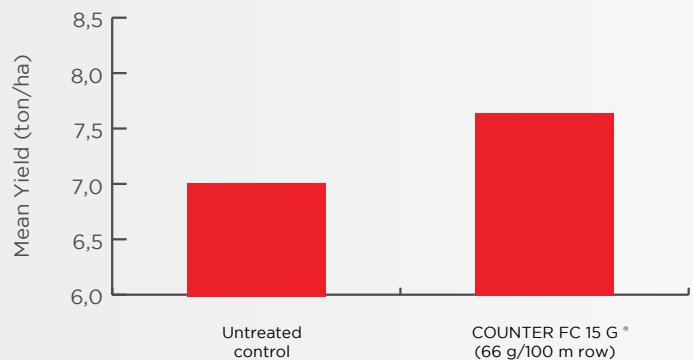

A granular soil applied contact and systemic insecticide and nematicide for the control of black maize beetle (*Heteronychus arator*), spotted maize beetle larvae (*Astylus atromaculatus*), nematodes (*Nematoda spp.*), rootworms (*Buphonella spp.*) and false wireworms (*Tenebrionidae spp.*) in maize

INSECTICIDE

The effect of COUNTER FC 15G in the control of nematodes on the overall yield of maize (tons per ha)

Features

- COUNTER FC 15G® is a soil applied granular insecticide
- Product has a contact and systemic action
- Cellulose based paper granule with natural breakdown, ensures reduced odour, dust free and improved flow-ability
- Low risk of groundwater contamination
- Does not leach downwards within the soil and thus highly effective where applied
- It has a strong anti-feeding action, inhibition can occur within hours

Label recommendations

Black maize beetle:

- 33 g COUNTER FC 15G® per 100 meter plant row

Spotted maize beetle larvae, false wireworm, nematodes, rootworms and wireworms:

- 66 g COUNTER FC 15G® per 100 meter plant row

Do's and don'ts

- Do not allow the granules to come into direct contact with the seed
- Apply only at planting time and ensure good coverage of granule with sufficient soil
- Optimal results would be obtained in moist soils
- Place granules by means of a planter mounted granular applicator directly ahead of the planter press wheel in a band of not more than 5 cm

ALWAYS READ THE LABEL BEFORE USE
