3. HAZARDS IDENTIFICATION

Emergency overview:

May cause sensitization by skin contact.

Health and Environmental

Product is expected to be harmful to aquatic organisms.

4. FIRST-AID MEASURES

Ingestion:

Rinse mouth with water. Give plenty of water to drink. Seek immediate medical assistance. Do not give anything by mouth to an unconscious person.

Eye contact:

Irrigate with copious quantities of water for 15 minutes. In all cases of eye contamination it is a sensible precaution to seek medical advice.

Skin contact:

Wash contaminated skin with plenty of soap and water. Remove contaminated clothing and wash before re-use.

Inhalation:

Move person to fresh air. Call a doctor immediately if necessary.

NOTE TO PHYSICIAN

No known antidote, however due to the low acute oral toxicity it is unlikely that one would be required. Likely symptoms of ingestion are nausea, vomiting, and diarrhoea. Supportive care. Treatment based on judgement of physician in response to symptoms of patient. Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Extinguishing Media

Water fog or fine spray. Foam. Dry chemical fire extinguishers. Carbon dioxide.

Hazardous Combustion Products

During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/ or irritating.

Protection of Firefighters

Wear protective clothing and use self-contained breathing apparatus.

Additional Information

Keep containers cool by spraying with water. Contain runoff to prevent entry into water or drainage systems.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions

Wear appropriate safety clothing and eye/face protection (see Section 8).

Environmental Precautions

Do not wash into sewers or into any body of water. Advise

water authority if spillage has entered water course or drainage system.

Methods of Cleaning Up

Soak up with sand or other non-combustible absorbent material and place into containers for disposal.

For large spills, barricade area and consult manufacturer.

If further assistance is required, telephone the emergency contact number.

7. HANDLING AND STORAGE

Handling

Use good personal hygiene. Do not consume or store food in the work area. Wash hands and exposed skin before eating, drinking or smoking and after work. Avoid skin contact.

Storage

Protect from excessive heat and cold. Do not allow to freeze - store in a cool, dry place (5 to 15 °C).

Product should be stored in compliance with local regulations. Store in the closed original container in dry, cool, well-ventilated area out of direct sunlight. Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers. Keep container closed at all times – check regularly for leaks.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines

None established.

Engineering Controls

Good general ventilation should be sufficient for most conditions.

Local exhaust ventilation may be necessary for some operations.

Respiratory Protection

For most conditions, no respiratory protection should be needed. When airborne comfort levels may be exceeded, use an approved air-purifying respirator.

For emergency conditions, use an approved positive-pressure self-contained breathing apparatus.

Hand/Skin Protection

For brief contact, no precautions other than clean body-covering clothing and impervious gloves should be needed. When prolonged or frequently repeated contact could occur, use protective clothing impervious to this material.

For emergency conditions: Use protective clothing impervious to this material. Selection of specific items will depend on operation.

Eye/Face Protection

Use safety glasses. Where contact with the liquid is likely, chemical goggles are recommended.

For aquatic organisms, material is expected to be harmful. Do not contaminate ponds, waterways or ditches with chemical or used container. **TRIPLE RINSE** empty containers in the following manner. Invert the empty container over the spray or mixing tank and allow draining for at least 30 seconds after the flow has slowed down to a drip. Thereafter rinse the container three times with a volume of water equal to a minimum of one third of that of the container. Add the rinsing to the contents of the spray tank before destroying the container in the prescribed manner.

Destroy the container by perforation and flattening and dispose of it in a safe way. Do not burn empty containers. Do not re-use the empty container for any other purpose.
