

## RAMETREX 410 EC

## **SAFETY DATA SHEET**

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: RAMETREX 410 EC

Other identifier: Bromoxynil as the octanoate

100 g/ $\ell$  + Dicamba 30 g/ $\ell$  + MCPA as the iso-octyl ester

280 g/e

Recommended use: Herbicide Restrictions on use: Agriculture

Supplier: Villa Crop Protection (Pty) Ltd.

Co. Reg. No.: 1992/002474/07

PO Box 10413

Aston Manor, 1630, South Africa

 Telephone:
 (011) 396 2233

 Fax:

### The most important adverse effects:

Physiochemical effects:

Combustible liquid.

## Human health effects:

Harmful if swallowed.

May be harmful if swallowed and enters airways.

May be harmful in contact with skin.

Causes mild skin irritation.

May cause an allergic skin reaction.

Causes eye irritation.

May be harmful if inhaled.

May cause respiratory irritation.

May cause drowsiness or dizziness

Suspected of causing cancer.

Suspected of damaging the unborn child.

May cause damage to organs (central nervous system)

through prolonged or repeated exposure.

#### Label elements:

**Signal word:** Warning **Hazard statements:** H227: Combustible liquid.

H227: Combustible liquid. H302: Harmful if swallowed.

H305: May be harmful if swallowed and enters airways.

H313: May be harmful in contact with skin.

H316: Causes mild skin irritation.

H317: May cause an allergic skin reaction.

H320: Causes eye irritation.

H333: May be harmful if inhaled.

H335: May cause respiratory irritation.

H336: May cause drowsiness or dizziness

H351: Suspected of causing cancer.

H361d: Suspected of damaging the unborn child.

H373: May cause damage to organs (central nervous system) through prolonged or repeated exposure.

H400: Very toxic to aquatic life.

H410: Very toxic to aquatic life with long lasting effects.

### **Precautionary statements:**

P203: Obtain, read and follow all safety instructions before use.

## RAMETREX 410 EC

## SAFETY DATA SHEET

P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P260: Do not breathe dust, fume, gas, mist, vapours and spray.

P264+P265: Wash hands thoroughly after handling. Do not touch eyes.

P270: Do not eat, drink or smoke when using this product.

P271: Use only outdoors in a well-ventilated area.

P272: Contaminated work clothing should not be allowed out of the workplace.

P273: Avoid release to the environment.

P280: Wear impervious rubber gloves and chemical safety goggles.

P301+P316: IF SWALLOWED: Get emergency medical help immediately.

P302+P352+P317: IF ON SKIN: Wash with plenty of water and non-abrasive soap. Get medical help.

P304+P317 +P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. Get medical help.

P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.

P318: IF exposed or concerned, get medical advice.

P319: Get medical help if you feel unwell.

P330: Rinse mouth.

P331: Do NOT induce vomiting.

P333+P317: If skin irritation or rash occurs: Get medical help.

P337+P317: If eye irritation persists: Get medical help.

P391: Collect spillage.

P403+P233: Store in a well-ventilated place. Keep container tightly closed.

P501: Dispose of contents/container in accordance with local regulations.

Special labelling of certain mixtures: None known.

Other hazards: None known.

**Toxicity:** 

Classification according to GHS: Category 4

#### 3. COMPOSITION / INFORMATION ON INGREDIENTS

Substance/Mixture: Mixture.

#### 4. FIRST AID MEASURES

Remove the victim from the area of exposure. Wash off remaining material with plenty of water. In the event of any

SAFETY DATA SHEET

## RAMETREX 410 EC

complaints or symptoms, avoid further exposure. Immediately consult a doctor.

**Inhalation:** Remove person from contaminated area to fresh air and assist breathing as needed. Seek medical attention if irritation occurs. Treat symptomatically and supportively. Single exposure to vapours is not likely to be hazardous.

#### Skin:

Remove contaminated clothing and shoes. Gently wipe of excess chemical. Wash skin gently and thoroughly with water and non-abrasive soap. Seek medical advice if necessary. Persons who become sensitised may require specialised medical management with anti-inflammatory agents.

**Eyes:** Flush eyes with clean water for at least 15 minutes. Lift eyelids to facilitate irrigation. If present, remove contact lenses after 5 minutes and continue rinsing. If eye irritation persists, get medical advice.

**Ingestion:** Unlikely to occur under occupational conditions. In case of deliberate ingestion, have victim rinse mouth thoroughly with water. **Do not induce vomiting.** Give plenty of water to drink (1 to 2 glasses). **Seek medical advice immediately.** 

**Anticipated acute effects:** May be harmful if swallowed and enters airways.

**Anticipated delayed effects:** Suspected of damaging the unborn child.

Most important symptoms/effects: None known.

**Advice to physician:** This product contains a phenoxy herbicide. There is no antidote available. Treat symptomatically and supportively. Gastric lavage with activated charcoal is advised.

#### **5. FIRE-FIGHTING MEASURES**

#### **Suitable Extinguishing Media:**

Carbon dioxide, dry chemical powders, foam and water.

**Unsuitable Extinguishing Media:** Water jet due to contamination risk. Use a water jet only to cool heated containers.

**Specific hazards:** Hazardous gases may be released upon combustion.

Special Fire Fighting Procedures: Remove spectators from surrounding area. Isolate the fire area and evacuate all personnel downwind of the fire. Fight fire from maximum distance and use unmanned hose holder or monitor nozzles. Keep upwind. Avoid inhaling hazardous vapours and fumes from burning materials. Remove container from fire area if possible and without risk. Do not use high volume water jet, due to contamination risk. Do not scatter the burning material. Water can be used to cool unaffected containers but must be contained for later disposal. Contain fire control agents for later disposal. Avoid pollution of waterways by run-off from the site.

**Personal protective equipment:** Wear NIOSH/MSHA approved self-contained breathing apparatus and full protective gear.

#### **6. ACCIDENTAL RELEASE MEASURES**

**Personal Precautions:** Avoid contact with skin and eyes. Do not breathe in vapours or spray mist.

**Protective equipment:** Refer to Section 8 for personal protective equipment to be worn during containment and clean-up of a spill involving this product.

**Emergency procedures:** Alert firefighting personnel, evacuate unprotected personnel and animals.

**Environmental Precautions:** Prevent spilled product from entering sewers, waterways or ground water as the product is classified to be very toxic to aquatic organisms and may cause long-term adverse effects in the aquatic environment. Any spillages or uncontrolled discharges into water courses should be immediately reported to the police and the Department of Water/Environmental Affairs. **Methods and Materials for Containment:** Contain spilled

**Methods and Materials for Containment:** Contain spilled product by diking area with sand or earth.

Methods and Materials for Clean-up: Cover contained spill with an inert absorbent material such as sand, vermiculite, earth or other appropriate material. Vacuum, scoop, or sweep up material and place the material into a clean, dry, sealable container. Label containers with the contents and dispose of according to local regulations. Do not place spilled material back in original container. Do not re-use spilled material. Collect washings and add to the drums already collected. Do not flush spilled material or washings into drains or waterways. To decontaminate the spill area, tools and equipment, wash with water and suitable detergent. See section 13 for disposal considerations.

#### 7. HANDLING AND STORAGE

#### Handling:

Precautions for safe handling: Avoid contact with skin and eyes. May be harmful if inhaled, ensure adequate ventilation during handling and use. Do not handle broken packages without protective equipment. Immediately clean up spills that occur during handling. Keep containers closed when not in use. In the case of contact with the product refer to First Aid Measures – Section 4.

General occupational hygiene: Practice good hygiene when using this material. Wash hands before eating, drinking, chewing gum, smoking, using the toilet or applying cosmetics. Worker should shower at the end of each workday. Launder all clothing before it is re-used again.

#### Storage:

Conditions for safe storage: Store under lock and key in its original container in dry, cool, well-ventilated area. Do not store near heat, open flame, sources of ignition or hot surfaces. Not to be stored next to foodstuffs, feed and water supplies. Keep out of reach of children, uninformed persons and animals. Do not contaminate other pesticides and fertilizers.

**Incompatible substances and mixtures:** Refer to product label.

## **RAMETREX 410 EC**

Packaging material: Fluorinated plastic containers.

# 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

#### Permissible concentration

Components	Exposure limits	Type of exposure limit	Source
Bromoxynil as the octanoate	2.3 mg/m3	1	Supplier SDS
Iso-butanol	50 ppm	8 h TWA	OSHA PEL

Engineering Controls: It is essential to provide adequate ventilation. The measures appropriate for a particular worksite depend on how this material is used and on the extent of exposure. Local Exhaust: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs or other specified exposure limits. Local exhaust ventilation is preferred. Ensure that control systems are properly designed and maintained. Comply with occupational safety, environmental, fire, and other applicable regulations.

Personal Protective Equipment: Respiratory Protection: If inhalation is likely to occur (airborne concentrations exceed exposure limits), use a NIOSH approved air-purifying respirator with cartridges/canisters approved for organic vapours.

**Hand Protection:** The use of chemically protective impervious gloves is recommended to prevent against skin contact with this mixture.

**Eye Protection:** The use of chemical safety goggles or a face shield is recommended to prevent against eye contact. Contact lenses are not protective eye devices.

Skin and Body Protection: Employee must wear appropriate protective impervious clothing; Rubber boots, hat and equipment to prevent repeated or prolonged skin contact with this substance. Do not wear leather clothing. Emergency eyewash: Where there is any possibility that an employee's eyes may be exposed to this substance; the employer should provide an eye wash fountain or appropriate alternative within the immediate work area for emergency use.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Transparent brown liquid.
Odour: Aromatic hydrocarbon odour.
pH (1 % aqueous dilution): 3.6.
Melting point: Not available.
Freezing Point: Not available.
Boiling Point: Not available.
Flash Point: Not available.

Flammability: Not available.

**Upper/lower explosion limits:** Not available. **Vapour Pressure (mm Hg):** Not available.

## **SAFETY DATA SHEET**

Relative Vapour Density: Not available.

**Density:** 1.053 (22°C ±2). **Solubility:** Emulsifies in water.

n-octanol/water partition coefficient: Not available.

Auto-ignition temperature: Not available. **Decomposition temperature:** Not available.

Viscosity: Not available.

#### 10. STABILITY AND REACTIVITY

**Chemical Stability:** Product is stable at ambient temperature and pressure, under normal storage and handling conditions.

**Storage stability:** Stable for up to 2 years when stored in a dry, cool covered warehouse in original, well-labelled containers. Store at low temperature conditions, below 50°C, preferably below 30 °C and not for prolonged periods in direct sunlight.

Reactivity: None known.

Possibility of Hazardous Reactions: Not available.

Conditions to Avoid: Extreme heat, direct sunlight,

exposure to flames or sources of ignition.

Incompatible Materials: Strong alkalis or oxidising

agents.

Hazardous Decomposition Products: Combustion may

release hazardous fumes.

### 11. TOXICOLOGICAL INFORMATION

#### **ACUTE TOXICITY:**

Based on experimental data:

Oral LD<sub>50</sub> rat 500 mg/kg.

Dermal LD<sub>50</sub> rat >2000 mg/kg.

Inhalation LC<sub>50</sub> (4h) rat > 5.410 mg/L. Skin Irritation: Causes mild skin irritation.

Eye Irritation: Causes eye irritation.

**Skin Sensitization:** May cause an allergic skin reaction.

Respiratory Sensitization: Not classified.
Reproductive cell mutagenicity: Not classified.
Carcinogenicity: Suspected of causing cancer.

Reproductive toxicity: Suspected of damaging the

unborn child.

Specific target organ toxicity – single exposure:

May cause respiratory irritation.

May cause drowsiness or dizziness

**Specific target organ toxicity – repeated exposure:** May cause damage to organs (central nervous system)

through prolonged or repeated exposure.

Aspiration hazard: May be harmful if swallowed and

enters airways.

**Chronic Effects** (other targets e.g. developmental): Not classified.

POTENTIAL ADVERSE EFFECTS: None known.

#### 12: ECOLOGICAL INFORMATION

This product is considered a marine pollutant.

**ENVIRONMENTAL EFFECTS:** 

(Bromoxynil)

Plants & animals – Metabolism by means of hydrolysis of the ester and nitrile groups, with some debromination.

**Persistence and degradability:** In lab.: DT<sub>50</sub> <1d. Degraded by hydrolysis and debromination to less toxic substances such as hydroxybenzoic acid.

**Bio-accumulative Potential:** Not determined. (incl K<sub>ow</sub>)

Mobility in soil: Not determined.

Other adverse effects: Not determined.

(Dicamba)

Animals – In mammals, rapidly eliminated in the urine, partly as glycine conjugate. Plants – Varies with species. In wheat, major metabolite is 5-hydroxy-2-methoxy-3,6-dichlorobenzoic acid.

**Persistence and degradability:** Microbial degradation occurs, principal metabolite 3,6-dichlorosalicylic acid. Under rapid metabolism  $DT_{50}$  <14d;  $K_{oc}$  242-2930, depending on soil.

**Bio-accumulative Potential:** Not determined. (incl K<sub>ow</sub>)

Mobility in soil: Not determined.

Other adverse effects: Not determined.

(MCPA)

Animals – Absorbed rapidly and excreted almost exclusively in the urine. Only moderate metabolism and small amount of conjugate formation. Plants – Hydroxylated at the methyl group with formation of 2-hydroxymethyl-4-chlorophenoxyacetic acid.

**Persistence and degradability:** DT<sub>50</sub> <7d, after initial lag phase.

**Bio-accumulative Potential:** Not determined. (incl K<sub>ow</sub>)

Mobility in soil: Not determined.

Other adverse effects: Not determined.

## 13: DISPOSAL CONSIDERATIONS

**Waste:** Open dumping or burning of this pesticide is prohibited. Waste resulting from the use of this product cannot be reused or re-processed. Never pour untreated waste or surplus product into public sewers or where there is any danger of run-off or seepage into water systems.

## **SAFETY DATA SHEET**

## RAMETREX 410 EC

Do not contaminate rivers, dams or any other water sources with the product or used containers. Comply with local legislation applying to waste disposal.

Container: Emptied containers retain product residues. Do not re-use the empty container for any other purpose. Invert the empty container over the spray or mixing tank and drain for at least 30 seconds after the flow has slowed down to dripping. Thereafter rinse the empty container three times in succession with one quarter of the container volume fresh water and decant the rinsate into the spray or mixing tank. Puncture the triple rinsed container and dispose of via an approved collector or recycler (<a href="www.croplife.co.za">www.croplife.co.za</a>). Do not bury, burn or donate the container to any other parties that may use it as a container for food or beverages. Observe all labelled safeguards until container is destroyed.

#### 14: TRANSPORT INFORMATION
